INSIGHT WORKS

Streamline your Shipping and Logistics in Business Central

Easily add carrier integration, real-time shipping rates, package management, and shipment tracking to Microsoft Dynamics 365 Business Central.

Streamline tedious and error-prone shipping tasks by seamlessly integrating Dynamic Ship with Dynamics 365 Business Central. Shop floor employees will reduce manual entry errors by scanning packages directly into Dynamics 365 Business Central.

Who uses Dynamic Ship?

Dynamic Ship from Insight Works is a shipping app designed specifically for Dynamics 365 Business Central and powered by the EasyPost API.

A prerequisite for Dynamic Ship is Dynamics 365 Business Central. Dynamic Ship is directly integrated into Dynamics 365 Business Central, allowing users to perform their shipping tasks within a single platform rather than navigating multiple platforms.

Benefits of Dynamic Ship

The benefits of Dynamic Ship include a streamlined shipping process saving time, and reducing errors by managing shipping tasks within a single platform.

Accurate. Credible. Reliable.
Dynamic Ship provides carrier service information and rates based on package weight, dimensions, and destination, so you know the most current information prior to shipments.
Simply click and choose!
Quote freight rates while taking an order and automatically add freight costs to the order with configurable markup rules.

Microsoft Dynamics 365 Business Central

Business Central is an ERP designed specifically for small or medium-sized businesses.

Package Tracking

Dynamic Ship provides real-time shipment updates across 100+ carriers, powered by the EasyPost API.

Intelligent delivery estimates

Dynamic Ship bolsters carrier-generated estimated delivery dates with proprietary tracking intelligence.

Package management

Dynamic Ship enables any business with shipping needs to fully manage tasks such as automatically creating package lists by package order, label printing for packages, and other tasks.

Capture package level details

Capture serial numbers, lot numbers, and assembly component details at packaging time, and increase shipping accuracy by scanning items, comparing them to the sales order, and picking documents.

The EasyPost Solution

EasyPost's mission is to provide the fastest, most reliable shipping API in the industry. Its best-in-class API has out-of-the-box integrations with more than 100 carriers around the world.

Shipping API

Compare rates and purchase labels across USPS, UPS, FedEx, DHL, and over 100+ regional carriers across the globe. All with 99.99% API uptime.

Rating API (SmartRate)

First-ever rating engine to return prices and time-in-transit predictions with 98% accuracy by analyzing over a billion historical shipments.

Tracking API

Real-time shipment updates through custom-branded tracking pages and webhook notifications.

Address Verification API

Fully CASS-certified, 99.8% accurate, and 10x faster than SmartyStreets, with cheaper geolocation than Google.

Label Purchase

Leverage EasyPost to easily print labels in minutes with the Create Label tool.

Significantly improve your parcel delivery performance with real-time analytics. Using EasyPost's carrier tracking data, build reports and dashboards that give you real-time visibility into your supply chain, allowing you to make complex decisions

Dynamic Ship Analysis

Dynamic Ship Analysis is a free app designed to analyze shipping data from Dynamic Ship. The analysis tool is built on the Microsoft BI platform. With this app, users have access to a host of real-time shipping metrics, including:

- Total shipping spend by month

- Total shipping spend by location

- Year over year comparisons

- The average number of shipments per week

- Total spend by shipping carrier

- Average spend per shipment weight

- Total spend by service level

- And more

93%

of US households have
received our shipments

Available on
Microsoft AppSource

How to Get Started

Many Dynamics 365 Business Central apps are licensed based on the number of users. With Dynamic Ship, the licensing model is simple: Dynamic Ship is based on location and not limited by the number of users. If a company has three locations and wants to use Dynamic Ship at all three locations, they simply need three licenses.

There are two ways to install and configure Dynamic Ship:

1 Business Central users can access an extensions marketplace from within their Business Platform. Users Simply search for "Dynamic Ship" within the extensions marketplace and follow the prompts to install the app.

2 Users can also visit the Microsoft AppSource website and search for "Dynamic Ship." Users can also click on the "Free Trial" button to install the app.

easypost.

EasyPost's best-in-class shipping APIs provide end-to-end flexibility and more control over parcel shipping and logistics processes for e-commerce retailers, fulfillment centers, marketplaces, and enterprises. Founded in 2012, EasyPost has 200 employees and is based in Lehi, Utah.
