

Simplifying order management for SMBs worldwide

Zoho Inventory is a cloud based order management system built for people like you and me, or people who run micro, small or medium businesses. It has helped thousands of businesses across different industries centralize and streamline stock flow, manage both online and offline sales and fulfillment, and supercharge order management across multiple cities, currencies and warehouses. Here are a few brands that use Zoho Inventory today.

How Zoho Inventory makes order management simple?

Plug and play setup

Single step sign up process, easy data imports and free training make Zoho Inventory ideal for everyone. Plus you get to try all features for free during the trial period.

Engineered for collaboration

Mounted on the cloud, Zoho Inventory can be accessed via the internet on computers and phones. Customizable user roles help streamline work distribution and tasks.

Built on solid inventory concepts

Track products flowing in and out of outlets and warehouses based on FIFO. Categorize and group item variants or divide them into batch and serial numbers for more efficiency.

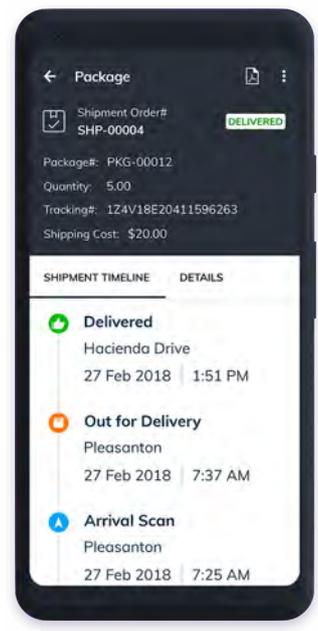

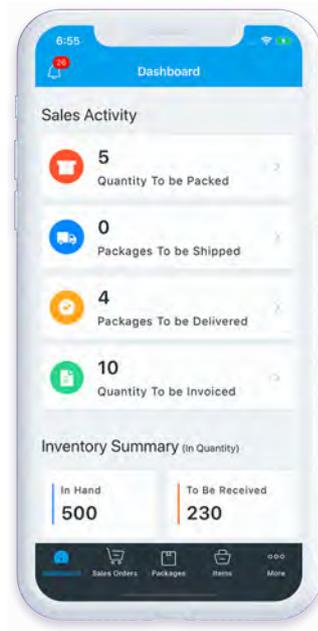

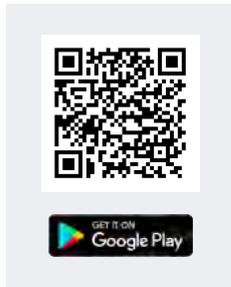

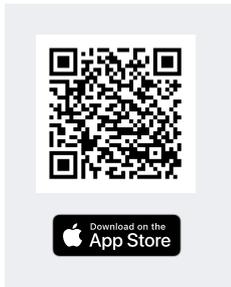

Optimized for multi-channel sales

Integrate with online sales channels and shopping carts to sync online orders. Fulfill orders via 30+ integrated shipping carriers. Setup stock alerts and plan purchases ahead.

We offer free training and premium support for all subscription plans and business types. We'd love to grow with businesses like you!
